TROCAL 76.
proEnergyTec.

Advanced heat insulation.

» TROCAL 76 proEnergyTec.

With TROCAL 76 you can design a living environment that ideally reflects your personal preferences. The modern TROCAL 76 PVC-U window satisfies all requirements of design, function, construction physics and insulation, and it is also eco-friendly and durable. Discover the advantages of TROCAL 76.

TROCAL 76. Window and door systems with 76 mm construction depth.

■ High-insulating proEnergyTec.

TROCAL 76 can be fitted with high-insulating proEnergyTec technology. Special techniques that ensure high torsional rigidity make it possible to dispense with the steel reinforcements in the window sash. The reinforcement chambers are filled with proEnergyTec foam to achieve the very highest heat insulation values.

■ Elegant design.

TROCAL 76 has such an innovative design that even with narrow profile surfaces high heat insulation can be achieved. In other words, you get large window surfaces for light-flooded rooms. The larger window surfaces also mean solar energy gains.

■ Effective noise protection.

In combination with high quality functional glazing, the TROCAL 76 system provides optimum noise protection, thereby enhancing quality of life.

■ Adds to your property's value.

High quality, first-rate eco-friendly plastics and lasting convenience of operation permanently add to the value of your property.
